214-1645 blvd de maisonneuve ouest, Montreal, QC, H3H 2N3

EDUCATION

Concordia University

Bachelor of Software Engineering (C.Edge), Montreal, QC

Graduated April 2023

Certificate

AWS Certified Cloud Practitioner

Amazon Web Services Credential ID: **Y3YCGE82V2411MS8**

Issued Oct 2023 - Expires Oct 2026

CAREER HISTORY

UKG

Software Developer (Back-End) Intern / Montreal, QC

May – Aug 2022

- o Developed innovative and user-friendly features for the upcoming multiposition service, enhancing its functionality and improving the overall user experience
- o Resolved various unit test cases for newly developed features
- o Utilized Jenkins for building customer database and for automated unit testing
- o Completed several new technology trainings offered by the company
- o Introduced documentation for local wfm setup in Linux operating system
- o Invested time in strengthening personal knowledge of the Spring Boot framework, exploring advanced concepts, best practices, and emerging trends

Technologies | •JAVA •SpringBoot •WFM •Jenkins •SQL •JIRA •Agile •Kubernetes •Methodology
•Github •Linux •Docker •IntelliJ

Haivision

Software Developer Engineer in Test (SDET) Intern / Montreal, QC

Aug – Dec 2021

- o Advanced the automation repository of the video streaming system by developing various automated tickets with Nightwatch JS and Selenium
- o Implemented Agile methodology and provided bi-weekly reports directly to the developers, which enabled timely project completion
- o Strengthened my proficiency in backend development by using Node JS to develop the backend of the automated website
- o Contributed to the engineering of various automation team projects, playing a pivotal role in the advancement of major features and resolution of multiple bugs

Technologies | •Nightwatch JS •Node JS •Python •SQL •JIRA •Agile Methodology •Github •Centos 7
•Docker •IntelliJ •Selenium •Kubernetes

Fusion BPO Services (GrubHub)

Customer Care Specialist / Montreal, QC

Jan 2019-June 2020

- o Resolved customer delivery order issues through chat and through call using different software namely Slack, five9 and one internal chat software
- o Coached new employees regarding the work environment and helping them understanding different software

PERSONAL AND SCHOOL PROJECTS

COVID-19-TRACKING-APP:

Jan 2022 - Apr 2022

Team Lead

GitHub: [GitHub](#)

- o Implemented the State Design Pattern to enhance code modularity and flexibility.
- o Developed the sign-in and sign-up page using Vue JS, ensuring seamless user authentication and registration processes.
- o Utilized Apache JMeter to conduct load testing, measuring system performance under heavy user traffic and identifying potential bottlenecks.
- o Worked diligently on creating Refactoring reports for every release, providing valuable insights on code improvements and optimizations.
- o Created visually appealing UI mockups for various pages, incorporating user-centric design principles and enhancing the overall user experience.
- o Diligently resolved multiple bugs for every sprint release, ensuring a stable and bug-free software product.

Technologies | •Node JS •Apache JMeter •Vue JS •SQL •Agile •Github • State Design Pattern •Mockito •AssertJ •Maven •Docker

Color Palette Generator

Sep 2023 – Oct 2023

GitHub: [GitHub](#)

- o Developed a dynamic color palette generator application using AWS services including Lambda, API Gateway, and S3 Bucket to store and manage color data.
- o Implemented the user interface with React JS for a seamless and interactive user experience.
- o Created a custom REST API powered by Node JS to handle color generation and management.
- o Utilized IAM roles for secure access control to AWS resources, ensuring data privacy.
- o Implemented continuous integration and deployment (CI/CD) workflows on GitHub to streamline development and updates.
- o Designed and maintained the application's backend architecture for optimal performance and scalability.
